BUILD A SECURE FUTURE.

2007 YEAR IN REVIEW

2007 has been an incredible year for AirBoss-Defense and our clients. So many new and exciting developments have occurred that it is difficult to believe that so much can happen in just 12 months.

Here are just a few of the developments that have happened over the past 12 months:

- 1) AirBoss-Defense introduced the new style BOSS fire boot. This new design is the direct result of user feedback, integrating new side holes and a reinforced toe for added durability.
- 2) The BOSS fire boot was the first fire boot to be certified by UL to comply with the NFPA 1994 standard for CBRN protection.
- 3) AirBoss-Defense was chosen as the sole provider of CBRN footwear and hand wear for the US DoD after several years of testing all competing products.
- 4) The AMG (AirBoss Moulded Glove) was certified by UL to comply with the NFPA 1994

- 5) standard for CBRN protection. AirBoss-Defense has become one of the fastest growing First Response PPE companies in the world.
- 6) AirBoss-Defense has expanded its international presence all the way to Australia and Latin America.
- 7) The AirBoss-Defense hip boot (3/4 length fire boot) became the first 31 inch fire boot to be certified by UL to comply with the NFPA 1971 standard for structural firefighting.
- 8) AirBoss-Defense introduced its "10 commandments of customer service".

As you can see, 2007 has been an active year for us at AirBoss-Defense. And we would like to thank our clients for their support and feedback.

We at AirBoss-Defense would like to sincerely wish all of you a very happy holiday season and best wishes for a healthy and prosperous new year!

THE NEXT STEP...

AirBoss-Defense the innovative company that has brought you the first fire boot to be certified by UL for CBRN protection (NFPA 1994), the first 31-inch fire boot to be certified by UL for structural firefighting (NFPA 1971) and the first rubber fire boot that truly looks, fits, feels and weighs like a leather fire boot, has done it again.

AirBoss-Defense is so confident in its products that it has decided to implement a LIFETIME WARRANTY on all of our fire boots. That's right, a LIFETIME WARRANTY against all manufacturer's defects on all AirBoss-Defense fire boots.

AirBoss-Defense has long been the frontrunner in offering the best warranty on our products. While the competition relies on a one year limited warranty for their fire boots, AirBoss-Defense has continually pushed for higher standards. AirBoss-Defense stands behind its products 100%, and we are ready to prove it with this never before seen offer in firefighter footwear.

That is why we have developed our LIFETIME WARRANTY against manufacturer's defects for all of our firefighter footwear solutions

This warranty ensures that our footwear will be free of any manufacturer's defects for the life of the footwear. It's that simple. When you purchase an AirBoss-Defense product, you are purchasing the best protection available. Please contact us to obtain the terms and conditions of this LIFETIME WARRANTY.

The only way to take advantage of this unique warranty is to purchase a pair of AirBoss-Defense fire boots at your local fire dealer. We invite you to try them out.

NATIONAL GUARD *Civil Support Teams*

The WMD Civil Support Teams were established under President Clinton to deploy rapidly to assist a local incident commander in determining the nature and extent of an attack or incident; provide expert technical advice on WMD response operations; and help identify and support the arrival of follow-on state and federal military response assets. They are joint units and, as such, can consist of both Army National Guard and Air National Guard personnel.

The mission of Weapons of Mass Destruction Civil Support Teams (WMD-CST) is to support local and state authorities at domestic WMD/NBC incident sites by identifying agents and substances, assessing current and projected consequences, advising on response measures, and assisting with requests for additional military support

The WMD civil support teams are able to deploy rapidly, assist local first-responders in determining the nature of an attack, provide medical and technical advice, and pave the way for the identification and arrival of follow-on state and federal military response assets. They provide initial advice on what the agent may be, assist first responders in that detection assessment process, and are the first military responders on the ground, so that if additional federal resources are called into the situation, they can serve as an advance party that can liaise with the Joint Task Force Civil Support.

The units ensure that strategic national interests are protected against any enemy; foreign or domestic, attempting to employ chemical, biological, or radiological weapons - regardless the level of WMD/NBC threat. They are a key element of the Department of Defense's overall program to provide support to civil authorities in the

event of an incident involving weapons of mass destruction in the United States.

They maintain the capability to mitigate the consequences of any WMD/NBC event, whether natural or man-made. They are experts in WMD effects and NBC defense operations.

These National Guard teams provide DoD's unique expertise and capabilities to assist state governors in preparing for and responding to chemical, biological, radiological or nuclear (CBRN) incidents as part of a state's emergency response structure. Each team consists of 22 highly skilled, full-time National Guard members who are federally resourced, trained and exercised, and employs federally approved CBRN response doctrine.

There are currently more than 50 CSTs active throughout the US and its territories.
